

Leo's Loo[®]

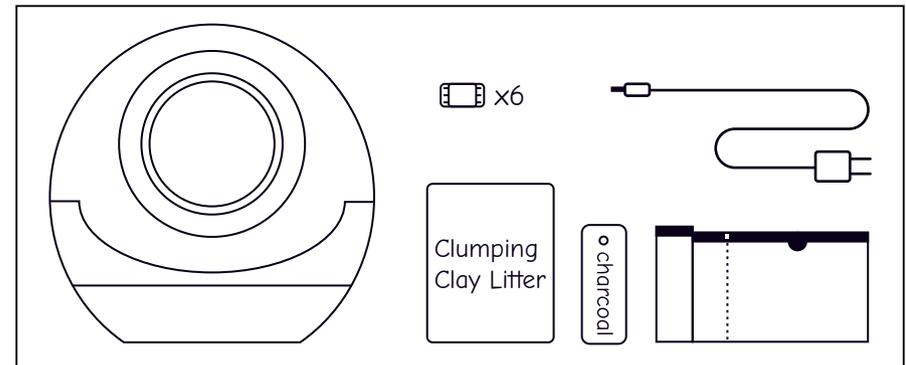

PLUG & PLAY

presented by

Smarty Pear[®]

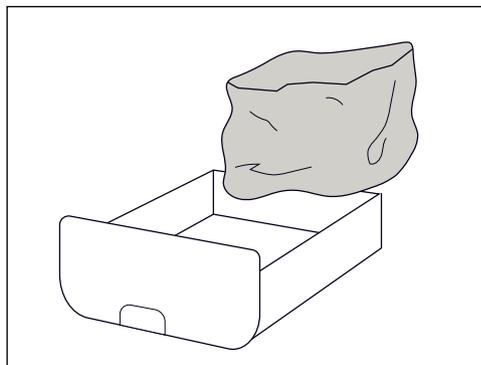

Contents

Included: Automatic litter machine, power adapter with anti-chew cord, Leo's Loo drawstring waste litter drawer liners, bamboo charcoal air filter pouch, and liner clips.

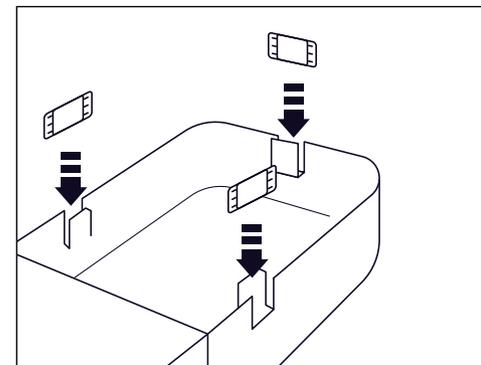

NOT included: Cat litter - ONLY use clumping clay type.

STEP 1

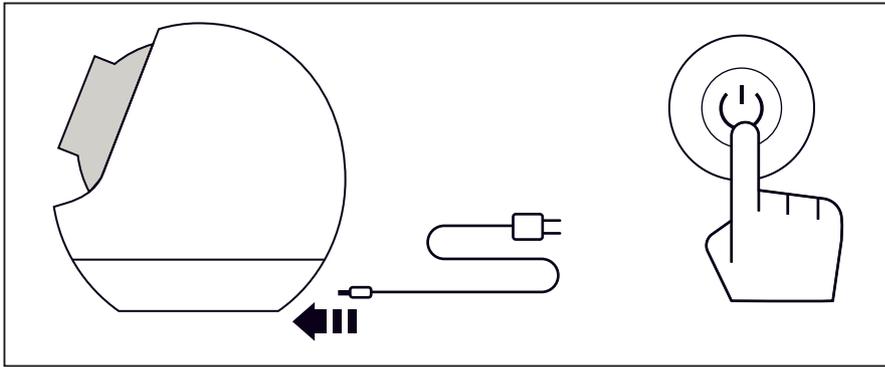

Pull out the waste litter drawer and line it with a litter liner bag. **Push the liner all the way down** and fit it firmly on the sides to prevent blocking the internal sensors. Place the charcoal air filter pouch in the drawer's middle compartment.

STEP 2

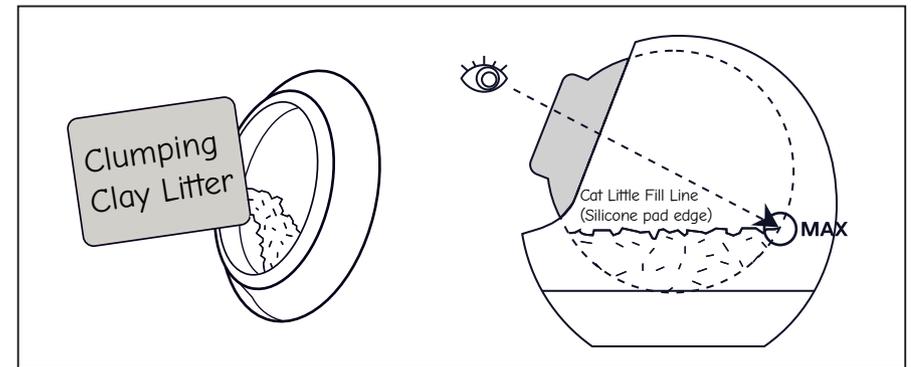

Push clips firmly down into their slots to secure the liner bag and **ensure they are not sticking up**. Gently push the waste litter drawer back into position.

STEP 3

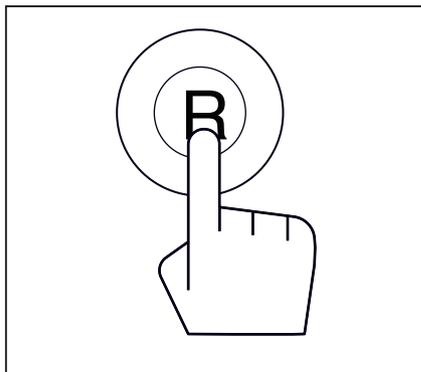

Plug in the power adapter, then **long press the POWER button for 3 seconds** to turn on the machine. Make sure to **place the machine on a solid flat surface** for the scale and safety sensors to work properly.

STEP 4

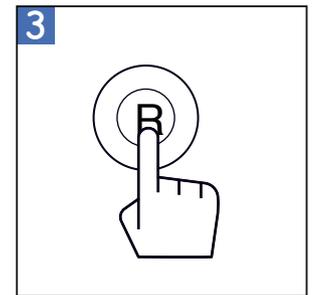

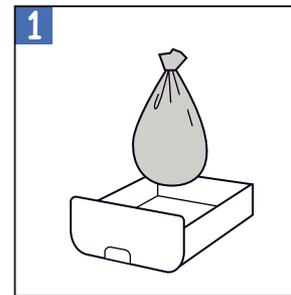

Pour about 1.2 gallons or approximately 10 lbs of litter. **ONLY use clumping clay litter. Do not fill beyond the point where the silicon bladder meets the back of the drum.** Overfilling will cause excess litter to collect in the waste drawer.

STEP 5

Short press the RESET button to zero the Kitty Weight and Loo Counter display. **Long press the RESET button for 3 seconds to switch between lbs and kgs.**

Emptying the Waste Drawer

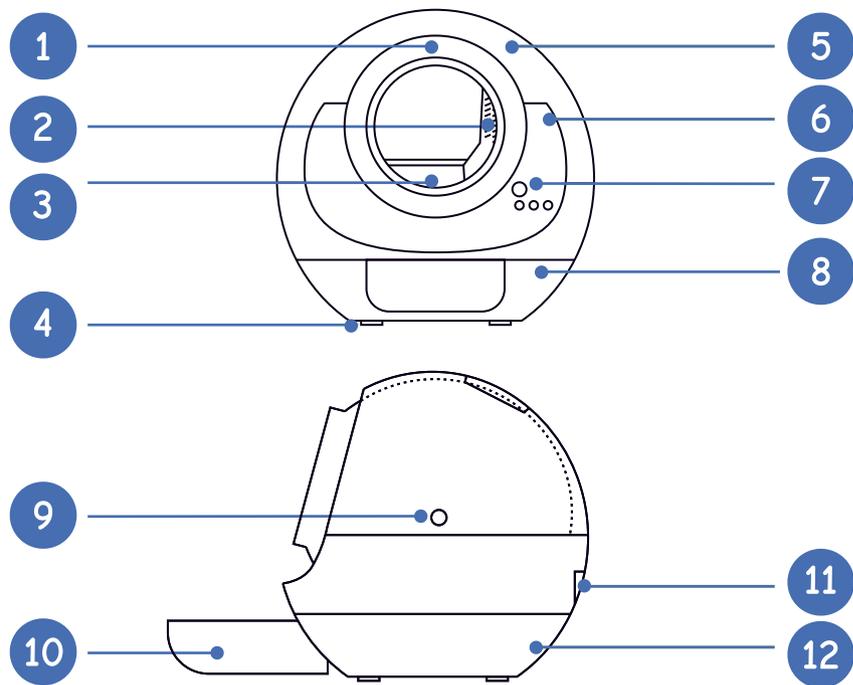

When the waste drawer is full, the night light will flash, the “!” indicator will light up, and the machine will stop rotating.

1. Pull out the drawer, remove and replace the litter liner and push the waste drawer back in. Top off the litter.

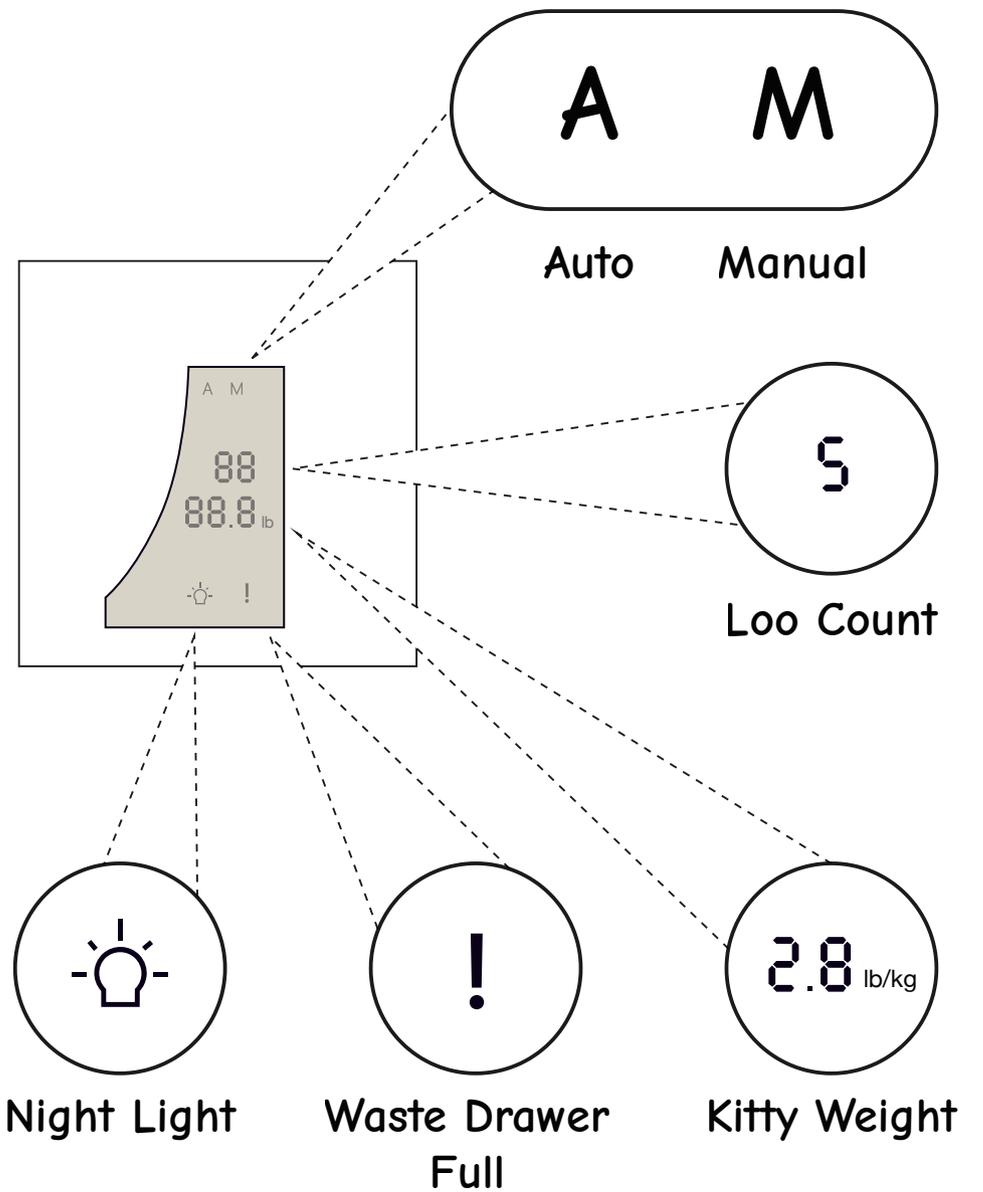

2. Short press the POWER button to reset alarm.

3. Short press RESET to zero the Kitty Weight displays.

Long press for 3 seconds to toggle between pounds (lb) and kilograms (kg) on the Kitty Weight display.

Smarty Pear®

Kitty Safety

1 Weight Sensors

The weight sensors at the bottom of the machine detect the presence of a cat heavier than 2 lb (1 kg). The machine will pause if a cat jumps on it while it's running a cycle. Do NOT use for cats weighing less than 2 lb (1 kg).

2 Anti-Pinch Sensors

In the case of an obstruction, the machine will stop and rotate backwards as a safety measure. The unit will then return to its normal cleaning cycle.

3 Electrical Safety

Low operating voltage of 12 V and anti-chew electrical cable.
